„We would like to express our great satisfaction with the quality of the work performed and the approach to the customer. The high quality of services provided has translated into continuous cooperation from February 2022.

As part of the cooperation, EBIS was very committed to responding to the needs of the Business Intelligence Excellence Team of Electrolux. The best practices and knowledge transfer were covered not only Microsoft Power BI but also Microsoft Azure and Microsoft Power Apps. The result of the cooperation was entry to another – higher level of reporting system. In addition to supporting the implementation and developments tasks, EBIS provided also series of practical workshops for Electrolux employees, where they gained a lot of useful knowledge."

Bartosz Hull – *Supply Chain Excellence Director*
